

**MICHIGAN STATE
UNIVERSITY**

November 22, 2016

Mr. Joseph Foster
Attorney General
NH Department of Justice
33 Capitol Street
Concord, NH 03301

Dear Attorney General:

Pursuant to your state's security breach notification law, this is to notify you that on Nov. 13, 2016, Michigan State University (MSU) was a target of a cyberattack that involved unauthorized access to a university database containing records of current and former MSU employees and students. 463 affected persons are residents of your state.

The database stored the following types of personal information: names, social security numbers, student identification numbers (APID), employee identification numbers (ZPID), and in some cases, dates of birth. The database **did not** contain financial, academic, contact, gift, or health information.

After determining the cause and nature of the breach, the affected database was immediately taken offline. The MSU Police Department continues to work diligently with federal law enforcement partners to investigate the incident.

MSU contracted with AllClear ID to enable affected individuals to enroll in credit monitoring and theft identity repair for a 24-month period at no cost to them.

MSU provided the attached notice letters to affected individuals via email, if possible, and regular mail.

MSU also posted information on its website at www.msu.edu/datasecurity. If you have questions or concerns about this letter, you may contact me at 517-353-3530.

Sincerely,

Theresa Kelley
Associate General Counsel
Michigan State University
